

IDS EasyOffice

Why Clients Choose IDS EasyOffice

- Easy, Mobile and Secure. Work form anywhere, on any device – securely.
- One support phone number. You don't need to call numerous different providers to get technical support. We'll do it all in one call.
- Single Sign On. One username and password for all your Apps.
- Experience. Over 20 years of advisory and technical consultancy services within the public and private sectors.
- Get back to business. Stop managing your company's IT and focus on the real business.
- Technical Expertise. We are only hiring the best technical specialists. All of our technical staff have at least 10 years working experience supporting IT requirements.
- Customer Service. IDS goes the extra mile on your behalf – We know how important IT is for your business.
- Best cloud services on the market. Before we suggest a cloud service provider we make sure that the service and its provider meet our demanding standards for performance, security and availability.
- Time and Money. Reduced cost, single supplier and fixed fees.

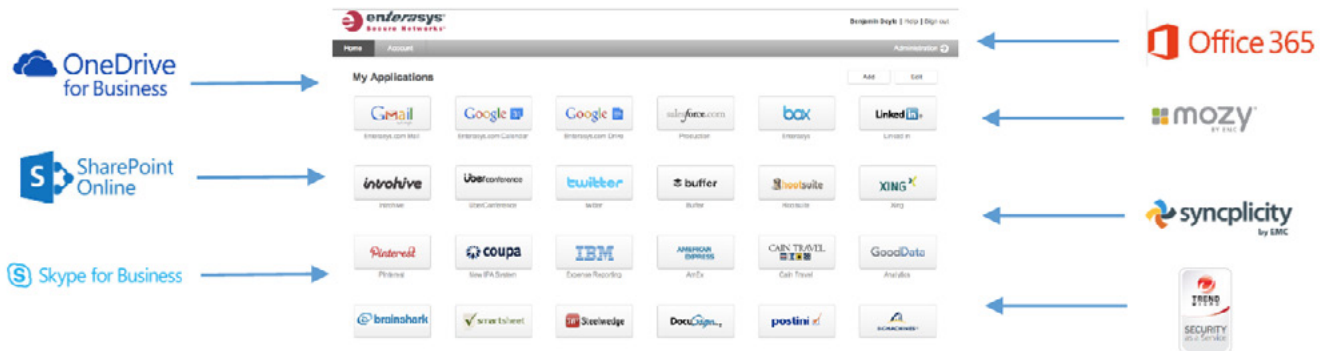

Flexible Cloud Solution

We address the issues of

- Time spent on IT
- Difficulties understanding and using many of the features
- Hardware and license costs
- System outages and failures
- The security of data
- Hard to budget IT costs
- Mobility – work form anywhere

IT'S THE TRADITIONAL DILEMMA for managers of small companies everywhere: balancing time to work on growing their businesses while still working on existing business challenges. A host of productivity tools including computer hardware, software, and network equipment have all helped small businesses strike a balance between growth and risk over the past two decades. Finally, even small businesses can achieve even faster growth while reducing risks and using great software tools.

All your Cloud Apps in one place
